## What is Semenex?

Semenex is an all-natural, patented powder drink for men that **safely and effectively sweetens semen** as it is produced in the male body, removing its normally salty-bitter taste and actually adding a **surprisingly somewhat sweet flavor -- and in only 24 hours!** Semenex is formulated from a fully patented and proprietary formulation of selected 100% all-natural ingredients from around the world. While the specific formulation and concentrations used in Semenex are understandably confidential and additionally protected by U.S. Patent, here follows an ingredient list of this product:

Pineapple; Broccoli; Banana; Celery; Strawberry; Fructose; Cinnamon; Ginger; Nutmeg; Citric Acid; Vitamins B6, B12, and E; Calcium; Magnesium; Creatine; Selenium; Zinc; and Chlorophyll.

Semenex is professionally manufactured, blended, packaged, and security-sealed by **American Supplement Technologies** ([www.americansupplement.com](http://www.americansupplement.com)), a fully FDA-inspected and certified nutraceutical company located in Tempe, Arizona.

## How Does Semenex Work?

Semenex works by combining just the right ingredients in the needed ratios and high concentrations to work its "magic" on semen taste. So, as your body is churning away producing semen, Semenex' ingredients are right there helping out and influencing the way it tastes. It has long been known that a myriad of factors can affect our bodies' chemistry influencing the way we smell and taste. Unfortunately, most of these factors have a decidedly detrimental effect on taste, including stress, alcohol, tobacco, caffeine, and diet.

Semenex was specifically researched and created to counter these natural negative effects on semen taste while additionally adding a near-sweet flavor that has been repeatedly documented and independently tested and reported in many national and international publications and Media-sponsored taste-test events.

### Semenex vs. Pineapple? No Contest!

The "*pineapple-sweetens-semen*" urban myth is just that: a myth. As anyone who has actually put this myth to the test quickly learns, there is little if any consistent positive effect from pineapple use alone. By contrast, this unique sweet-tasting powder drink combines the perfect ratios of **3 fruits and 2 vegetables at nine times their normal concentrations**. Added to this precise blend are **3 spices** essential to removing semen's normally bleachy/bitter taste.

## Semen's Natural Health Benefits

While our "Modern Age" regards such sacred semen drinking (seminiphagia) as backward, un-enlightened, and "perverted," yet modern research has already made remarkable discoveries scientifically validating these ancient erotic beliefs and practices.

Two recent research studies (see columns above) have independently concluded that semen from a healthy male possesses "*as-yet unknown properties*" key to women's physical and psychological health that both validate and vindicate the erotic and spiritual importance rightfully attributed to semen by our ironically more-enlightened "primitive" ancestors.

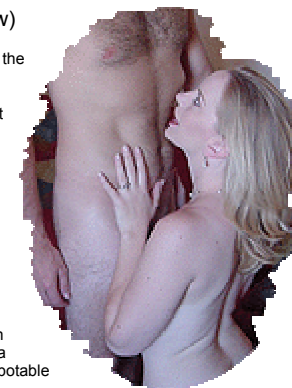

### Primary Benefits of Regular Semen Consumption

1. Alleviates depression symptoms in females
2. Assists in ensuring healthy pregnancy
3. Helps to balance cyclical female hormonal levels
4. Provides important nutritional supplement

## Instructions and Tips for Use (Important to Read and Follow)

Semenex works as the body produces new semen, adding its ingredients to the semen-producing process, which, in turn, affects the taste. And while the male body continually produces semen, it is during our sleep cycle that this production really goes into overdrive. Before taking Semenex, it is important to first get rid of the non-Semenex-enhanced semen already built up in your system so that only the flavor-enhanced semen produced with Semenex will be "on tap" for your lucky lover.

Given these facts, here follow the optimal procedures for using Semenex:

1. About an hour or so before bed, **ejaculate at least a time or two** before taking Semenex, so as to get rid of as much of the naturally bad-tasting semen as possible (no sense diluting the good-tasting semen to come with the "bad" already present).
2. Shortly before bed open Semenex container, **stir contents well**, then **pour one serving** (two level tablespoons / scoops) of Semenex into a lidded container of **6 ounces (175 ml) of water** or any other desired potable liquid or beverage (such as fruit juice or fruit "smoothie"):
3. Close the container lid and **shake contents vigorously** (*that's right, "shaken, not stirred"*). **Then drink.**
4. While Semenex will enhance semen taste in as little as 12-24 hours, it is recommended to repeat Steps 2-3 for an additional one to two nights, **being careful not to ejaculate further** (the human male physiology takes approximately three days to fully replenish semen supply).
5. For best results, an additional serving of Semenex may also be taken about mid-morning or lunch the following day(s), thereafter. **Take no more than two servings per day.**
6. **Within 24 hours of having last drank a serving of Semenex** (whether Semenex has been taken for one, two, or more nights in succession), have your lover drink down the Semenex-enhanced semen you have so thoughtfully prepared just for her.

### Dietary/Regimen Tips for Optimal Semenex Results

Even though Semenex works great in significantly improving semen taste even if your diet is less than ideal, yet should you choose to help heighten the Semenex effect even further into the sweet-tasting range, here follows a list of dietary recommendations to help you get the most out of the Semenex boost:

Recommended	Try to Avoid
<ul style="list-style-type: none"> <li>- 4-6 glasses (8 oz.s) of water daily (hydration decreases saltiness, also helps increase semen volume)</li> <li>- A diet predominant in fruits, grains, vegetables, and white meats.</li> <li>- At least 7 hours of continuous sleep per 24 hours</li> </ul>	<ul style="list-style-type: none"> <li>- Asparagus</li> <li>- Garlic</li> <li>- Onions</li> <li>- Fish</li> <li>- Red meat</li> <li>- Dairy products</li> <li>- Tobacco products</li> <li>- Alcohol products with the exception of "naturally fermented" liquors (e.g., certain beers [Kirin, Rolling Rock, etc.], sake)</li> <li>- Caffeinated drinks: Coffee, Tea, Ginseng, Soda</li> <li>- Stress! (Yes, this can affect taste, too.)</li> </ul>

**WARNING:** Semenex does contain fructose, a natural sugar. Thus, if you have a glucose sensitive or intolerant condition (e.g. diabetes, hypoglycemia), consult your physician before using Semenex.
